

PEPPERMINT GROW KIT

POT

GROW
MEDIUM

SEEDS

SPROUT TIME **10-14 DAYS** HARVEST TIME **45-70 DAYS**

PREP Remove all components. The pot is for seed starting and is meant to biodegrade over time, it is not water tight. Use a coaster to protect surfaces from moisture.

EXPAND Place grow medium discs into pot. Add 1 tbsp of water at a time to expand, using your fingers to break apart. If grow medium is still dry, add 1 tbsp of water at a time until fully expanded.

PLANT Sprinkle seeds on top of grow medium, do not bury mint seeds. Set pot in a warm, sunny spot or under a grow light. Keep your pot in temps between 65°F-70°F, use a heat mat if necessary.

PRO TIP: Cover top of pot with plastic wrap for the first 3-5 days to trap humidity and encourage sprouting.

GROW Set a reminder to check grow medium every 2-3 days. If grow medium is dry, mist or add 1 tbsp of water. Transplant when sprouts reach 3-4" tall.
